Thanks Error Failed to Launch Steam Client Yes, i do know this, but it's still a good question and i still tried to help you. what you tried so far worked. To install it I only need to update my client or refresh the cache. If there is not anymore any download in the marketplace then it is probably because the game has a DRM issue. Find the equation of the line tangent to the curve  $(x^2 + y^2 + 2x - 1) = 2y$  at the point with coordinates  $(-1,0)$  I have:  $\frac{x^2 + y^2 + 2x - 1}{2} = y$  But that's where I'm stuck... I'm trying to find the point of tangency and the slope of the tangent line but I can't seem to find an equation of that line with those parameters... A: A line through the point  $(-1,0)$  is  $\frac{-x+1}{y} + \frac{x+1}{y} = 1$ , and the derivative of that is  $\frac{x+1}{y^2} + \frac{-x+1}{y^2} = 0$ , so the slope of

---

that line is  $0$ . So the equation is  $-x+1=0$ , or  $x=-1$ . Q: Sorting an ArrayList of Integers by an integer parameter I need to sort an ArrayList of Integers by an integer parameter. Currently I have: `ArrayList returnSort = new ArrayList(); returnSort.addAll(sortByActivity(exerciseActivity, sortByName, sortByNumberOfReps, sortByTimeToComplete, sortByDistance)); Collections.sort(returnSort);` I've tried to implement what I've read here and here, but I can't quite make it work, and I'm sure there is a far better way of doing this... Here 82157476af
