The mod lets you specify custom music when fighting or selecting enemies of the type you choose. There are options to let you change the volume of the custom soundtrack on the fly and also change the individual tracks. No direct download. The full package is provided on the ScriptHook.com website. I will be releasing this mod in the near future. Installation: Install the official combat mods, then get the script, place it in the custom scripts folder of your Steam directory. If you have no custom scripts folder, create it. (Its called customscripts in the steam directory.) Now click the scriptHook.com Mod tab in the game, choose CSO on Steam, then the CSO folder, then find the script. Once you have it copied to your game directory, it will be in the scripts folder of the game. Control: Install the mods you wish to use, you may need to make some custom scripts for the custom weapons. More Information: Some may say I stole the script from HellLizard, but I assure you, it was a standalone script that I took from his website. Original mod notes and credits: This was made by HellLizard for Ultimate Customized Permissions: This is open source. Feel free to modify or redistribute, in return please link back to this page so people can

download the mod. If you want a screen capture of my control panel with all the settings, let me know and I will be happy to oblige.
